RESEARCH GRANTS AND CONTRACTS: CURRENT

Principal Investigator

Grant #1921526 from the National Science Foundation, Division of Social and Economic Sciences, Program on Methodology, Measurement and Statistics to study *Advances in Skin Color Measurement: Reliability, Validity, and Feasibility of Portable Devices for Field Research in the Social, Behavioral, and Economic Sciences* (\$373,197; co-PI: Amelia Branigan, University of Maryland, 9/1/19 – 8/31/21).

This project will advance the measurement of skin color in survey field research by determining whether a new generation of portable devices for color measurement are practically feasible and scientifically sound for large-scale field-based survey research. The project also seeks to better understand how physical measures of skin color compare to widely-used interviewer-coded skin color scales.

Grant #R03HD096203 from the National Institute of Child Health & Human Development to study *Images of Children and Adults for Health Research* (\$162,048; co-PI: Robert Crosnoe, University of Texas at Austin, University of Texas at Austin, 04/01/2019 – 03/31/2021). (*Impact Score: 10, Percentile: 1*).

This project will expand the existing archive for a major longitudinal study (the NICHD Study of Early Child Care and Youth Development [SECCYD]) to include an innovative collection of images of children and adults. Short slice (7-second) video of children, mothers, and fathers from the child's birth to age 15 will be deposited at ICPSR to facilitate secondary data analyses.

Grant #R03HD098310 from the National Institute of Child Health & Human Development to study *Harmonizing Two NICHD-funded Datasets to Study Youths' Behavioral Health* (\$165,712; co-PI: Ariel Aloe, University of Iowa, 08/01/2019 – 07/31/2021). (*Impact Score: 10, Percentile: 1*).

This project will expand two public-use datasets in innovative ways by placing measures of youths' behavioral health on a common metric both between datasets and across subgroups within datasets, by harmonizing the subgroup variables as well as key design variables, by demonstrating the utility of the linked scores in comparison to the original raw scores, and by creating a crosswalk of variables needed for high-priority research questions using the linked scores.

Co-Investigator

Grant # R305A160010 from the U.S. Department of Education, Institute of Education Sciences, National Center for Education Research, Goal 5 (measurement) to study *Development and Validation of the Emotional Teacher Rating Scale (EMOTERS) for Preschool Classrooms* \$1,400,000; PIs: Katherine Zinsser and Timothy Curby; Co-Is: Rachel A. Gordon; 07/1/16 – 06/30/20).

The goal of this project is to develop a new measure of social and emotional teaching. Researchers will (1) identify social-emotional teaching practices that are connected to research, policy, and practice; (2) develop items and establish full-scale coverage for each construct by iteratively consulting with research, practice, and policy experts and coding existing classroom videos, and (3) establish preliminary evidence of reliability and validity through a field test of the new measure, including through associations with children's school readiness.

Child Care Policy Research Partnerships Grant from the Office of Planning, Research, and Evaluation (OPRE) in the Administration for Children and Families (ACF), U.S. Department of Health and Human Services to study *Evaluating Investments to Expand High Quality Child Care Utilization and Supply in Illinois*; PI: Robert Goerge, Chapin Hall Center for Children; Co-Is: Rachel Gordon; 11/19-11/23.

A partnership with the Illinois Department of Human Services (IDHS), Office of Early Childhood; Chapin Hall at the University of Chicago; the Illinois Network of Child Care Resource and Referral Agencies (INCCRRA); and, the Illinois Head Start Association that focuses on improving the capacity of IDHS and the early care and education system to conduct research and analysis and do so in a manner that is responsive to decision-making timelines.

RESEARCH GRANTS AND CONTRACTS: COMPLETED

Principal Investigator

Grant #R01HD081022 from the National Institute of Child Health & Human Development to study *Predictors of*

Achievement from Early Childhood to Adulthood (\$736,482; co-PI: Robert Crosnoe, University of Texas at Austin; co-Is, Judith Langlois and Daniel S. Hamermesh, University of Texas at Austin, 06/1/15 - 05/31/18; NCE 6/1/18 – 5/31/19).

This project significantly contributed to the growing body of research on physical attractiveness as a source of social stratification with wide implications for health, akin to more frequently studied factors like race and gender. We created and analyzed the largest-ever public repository of physical attractiveness ratings for a cohort from birth into young adulthood.

Internal Funding for the *Copyright Policy Initiative* at IGPA. (AY 17-18: \$36,000, AY 18-19 \$60,733; Visiting Scholars: Paul-Brian McInerney [UIC Sociology] and Benjamin Superfine [UIC Educational Policy]).

The Copyright Policy Initiative examined institutional and legal frameworks that lead some measures to be copyrighted and sold, whereas others are not, and considered how organizational form and mission related to the cost, quality, and adaptability of measures. The project's significance relates to continued high-stakes use of measures throughout educational and social policy and recent changes in intellectual property rules for federally-funded educational research.

Internal Funding for the *Early Investments Initiative* at IGPA. (AY14-15: \$59,125; AY 15-16: \$39,634; AY 16-17: \$79,825; AY 17-18: \$48,500). co-PI: Elizabeth Powers, IGPA-Urbana; Visiting Scholars: Katherine Zinsser, Kathleen Sheridan, Catherine Main at UIC and Angela Wiley at UIUC).

The Early Investments Initiative built connections among researchers, practitioners, and policymakers and infused new, rigorous evidence into decision-making. The project included multi-faceted research and engagement activities aimed at better understanding the child care marketplace, the early care and education workforce, and the quality of preschool and child care classrooms.

Grant #R305A130118 from the U.S. Department of Education, Institute of Education Sciences, National Center for Education Research, Early Childhood Program (Goal 1) to study *Measuring Preschool Program Quality: Multiple Aspects of the Validity of Two Widely-Used Measures* (\$666,373.97; co-Is: Kerry Hofer and Sandra Wilson, Vanderbilt, and Everett Smith, UIC, 06/1/13 – 05/31/15; NCE 06/1/15 – 05/31/16).

This project examined two widely used measures of quality, the ECERS-R and CLASS, including their structural validity (dimensionality of each scale), response process validity (order, fit and separation of items along underlying dimensions), and predictive validity specific to cutoffs defined in policy system (Quality Rating and Information Systems; Head Start Recompensation). We studied these aspects of validity across a dozen datasets, using meta-analyses to systematically accumulate results.

Grant #ACF 90YE0144 from the Administration for Children and Families (ACF) of the U.S. Department of Health & Human Services (DHHS) as Faculty Mentor for Anna Colaner's Child Care Research Scholar Dissertation Award for "Sociodemographic Disparities in Market Change and Programmatic Mission Under Preschool for All: A Case Study of Illinois," (\$49,035, 9/10/13 – 9/9/15).

Anna Colaner's dissertation drew on sociological theories of markets to investigate whether the introduction of Preschool for All, a universal preschool plan in Illinois, has had a disparate impact across sociodemographic groups. The principal objectives were to analyze quantitative data and to collect and analyze qualitative data to determine if and how Illinois' Preschool for All plan affected the producer preschool market, with particular emphasis on disparate implications by family demographics.

Grant #R01HD060711 from the Eunice Kennedy Shriver National Institute of Child Health and Human Development to study *Child Health, Cognition, and Behavior: Domain-Specific Estimates of the Effects of Child Care Quality Using Several Large-Scale Datasets* (R01, \$942,826; co-Is: Robert Kaestner, Sanders Korenman, Everett Smith, Lauren Wakschlag, 1/15/2010-12/31/2012; nce 12/31/2012-12/31/2013).

The major goal of this project was to examine the association between child care quality and child cognitive, behavioral and health outcomes focusing on new domain-specific (cognition, behavior, health) measures of quality. The study used four longitudinal data sets to establish new measures of quality and to examine patterns and changes in the quality of care settings used from infancy through preschool, including transitions among maternal care and family day care and child care centers of varying quality, and how these trajectories in the quality of these care settings relate to child outcomes, within domains of development.

Grant #R305A090065 from the U.S. Department of Education, Institute of Education Sciences, National Center for Education Research, Early Childhood Program (Goal 1) to study *Specific Aspects of Quality that Support Children's School Readiness in Community-Based and School-Based Early Childhood Programs* (\$602,792; co-Is: Robert Kaestner, Sanders Korenman, Everett Smith, 5/16/2009-5/15/2011, no cost extension 5/16/2011 to 5/15/2012).

The major goal of this project was to examine the association between quality of preschool classrooms and child health, behavioral and cognitive outcomes in community-based and school-based early care and education programs. The project combined rigorous psychometric analyses of existing measures of preschool classrooms with regression analyses associating quality to child outcomes, within domains.

Award for the 2012 Chicago Area Study on the topic of *Racial/Ethnic Differences in Child Care Supply: Is the Great Recession Widening Disparities?* (\$50,000; 1/1/2012-12/31/2012).

Supplemental Awards for the 2012 Chicago Area Study from the UIC College of Liberal Arts and Sciences, Research Grant Support Program-Social Sciences (\$8,000; 11/21/11-8/15/12) and the UIC College of Liberal Arts and Sciences, Office of Social Science Research Seed Grant (\$2,940; 11/21/11-6/30/12)

The study used mixed methods, combining in-depth community assessments, in-depth interviews with a stratified random sample of child care center directors, and phone interviews with additional child care center directors. We selected several adjacent ZIP codes on the West and North side of Chicago with varying demographic (socioeconomic and racial-ethnic) compositions and varying child care supply. The broad study goals are to contribute to the literature regarding variation in the types of child care found in communities and used by families of different race-ethnicities as well as the social construction of definitions of the quality of child care.

Grant from the U.S. Department of Agriculture, Economic Research Service, Research and Innovation Development Grants in Economics (RIDGE) program awarded by subcontract from the Harris School of Public Policy Studies at the University of Chicago to study "*Nutritional Assistance in Child Care and at Home: Correlates of Program Participation and Associations with Child Outcomes*"(\$40,000; co-Is: Robert Kaestner, Sanders Korenman, 10/1/2008-12/31/2009)

The major goals of this project were to provide a national portrait of which child care providers participate in the Child and Adult Care Food Program (CACFP) and how children's attendance at participating settings associates with their food consumption, food security, and overweight status.

Grant from the Office of Social Science Research, University of Illinois at Chicago to transcribe in-depth interviews for a study of "*Race and Place: Variation in the Rise and Fall of Gang Participation, Gun Carrying, and Drug Selling Among Pittsburgh Youth During the 1990s*" (\$4,950; 11/7/2008-6/30/2009)

Grant Number 00ASPE345A from the U.S. Department of Health and Human Services, Assistant Secretary for Planning and Evaluation for study of "*Young Mothers' Transitions on and off TANF: How Do Child Care Assistance, Job Training, and Social Supports Influence These Decisions?*" (\$136,524; 6/1/2000-9/30/2001; co-PI: Carolyn J. Heinrich)

Grant from the Office of Social Science Research, University of Illinois at Chicago to study "*Changing Living Arrangements: Reliability, Validity, and Response Burden of Data Collection Approaches*" (\$2,509; 9/21/1999-

6/30/2000)

Grant from the National Science Foundation, Division of Social, Behavioral and Economic Research, Professional Opportunities for Women in Research and Education Program for study of “*Simultaneity in the Timing of Young Women’s Non-marital Homeleaving, Non-marital Fertility, and Marriage*” with tutelage from Lee Lillard (\$50,000; 9/1/1998-8/31/1999)
